**Random Ethnobotany Notes by Pankaj Oudhia. Part-519**

"All herbs are not required to burn. Many aromatic herbs with similar properties can be used in a way so that simply the odour of such herbs can make the men impotent within no time for certain time period." The Healers of Niyamgiri Hills informed during interactions.

 When they demonstrated its effects on me I noted that the odd smell of herbs distract the attention from sex and also directly affect the male organ within no time. The Healers demonstrating this miraculous experiment remained unaffected as they were chewing antidote.

Through my Ethnobotanical surveys from year 1990 to 2012 I collected information about 500 herbs and herbal formulations having this unique medicinal property. Unfortunately modern medical literatures give very little information on this aspect. May be the researchers have considered it as knowledge of least use but in present situation when women are not safe and sexually harassed frequently as scientist I feel that the ancient knowledge  must be given a chance for their safety.
